

1. I think I should've read the handout more carefully and also finished up whatever work I had with HW 5 before this homework. I spent a good bit of time trying to make my graph ADT memory-efficient and was very confused as to how to make it even better to make ProfessorPaths work with something like lego2010.csv, but that was a very bad idea to do. Oops
2. Nothing much. Thank you all for helping a lot on discord
3. The Pair class is a thing in Java
